DAF PARTS & SERVICE MAGAZINE

Driver comfort edition

Pedro Antonio Diaz
Driver at Grupo Tractole, Ciudad Real, Spain

Award-winning comfort with the DAF electric XD and XF

The PACCAR Connect Tablet reduces clutter and sharpens focus

Award-winning driver comfort

There's no doubt about it: DAF trucks are extremely comfortable to drive. DAF knows it, we confirm it, fleet managers and drivers are saying it too. The jury of the International Truck of the Year award 2026 also highlights this feature as one of the winning aspects of the New Generation DAF XD Electric and XF Electric.

Driver comfort, for both diesel and electric trucks, is the theme for this edition of our magazine. Find out what makes DAF trucks so good to drive. Joining us for the journey are manager Gerardo Calvo Moreno (*pictured left*) and driver Pedro Antonio Diaz (*pictured right*), from the Spanish road freight forwarder Grupo Tractole.

DAF customers for 20 years, Gerardo and Pedro appreciate the spacious cab design. "All the DAF trucks I've driven have been comfortable," says Pedro, who clocks up 11,000 kilometres a month on the road, now

in a new XG 480. "I like the driver's position, with a low belt line and a good view of the road. And, with the advanced equipment, I feel safe especially when turning".

A family business since the 1980s, Grupo Tractole moves a wide range of goods, and specialises in transporting glass bottles and alcohol. Based in Madrid, with four warehouses, including one in Ciudad Real, the company operates across Spain and occasionally in Portugal and Morocco too. It employs 82 people, including 42 drivers. All but two of Tractole's fleet of 44 diesel vehicles are DAF trucks, including both XF and XG models. "Once Spain builds a more comprehensive charging network, we'll look at electric as a cheaper option and one that is also better for the environment," says Gerardo. "We're very happy with DAF. We've chosen DAF trucks for their fuel efficiency and competitive pricing".

Are you ready? Join us on the road ahead!

What to expect in this magazine?

The all-in-one PACCAR Connect Tablet that drivers want

Over 25.000 users already, the PACCAR Connect Tablet brings all your favourite apps together on one screen.

Choose DAF Reman Starters and Alternators – for a guaranteed start every time!

A stress-free start is what every driver wants. The owner expects maximum uptime with no surprises. So, it pays to invest in quality replacement parts.

DAF Genuine Remanufactured Starters and Alternators are the smart choice. A remanufactured part is a used OEM part that has been stripped down and had any of its worn components replaced. They're built on the same production line as DAF's original parts, so you're assured of genuine components and the latest technical updates. Plus, DAF puts them through a rigorous testing regime, guaranteeing you 100% DAF quality that you can fully rely on!

Some powerful arguments

With starters and alternators, it's crucial the reman parts can generate sufficient power. Starters must produce a powerful start, turning on the engine successfully whatever the prevailing conditions. Alternators need to generate enough power to charge the battery as well as keep the vehicle running efficiently on the road.

DAF Genuine Remanufactured Starters and Alternators are made to the highest DAF technical and quality specifications, ensuring a perfect fit, maximum vehicle uptime and reliability.

Find out more about
DAF Genuine Reman parts

Engineered specifically for DAF trucks, they are renowned for their energy efficiency, which means they're a sound investment offering lower operating costs. They're good for the environment as well, giving original parts a second life!

Fit DAF Genuine Reman Starters and Alternators and be sure of a comfortable start every time!

A comfortable start

"Remanufactured DAF parts at a good price – sounds like a good deal. Luckily, our DAF trucks have always been good starters!"

Gerardo Calvo Moreno,
Manager at Grupo Tractole,
Ciudad Real, Spain

The all-in-one PACCAR Connect Tablet that drivers want

Find out more about the
PACCAR Connect Tablet

Over 25.000 users already, the PACCAR Connect Tablet brings all your favourite apps together on one screen.

The tablet has been extensively enhanced and upgraded in response to customer feedback. Now a fully functional, all-in-one unit, it can replace multiple third-party displays with a single intuitive touchscreen. This cleaner dashboard setup improves driver comfort and safety by reducing distractions. A specially designed holder positions the screen within easy reach, making it safe to use without restricting the driver's direct vision.

Driver-friendly tools

With a growing online app library containing 40+ apps, the PACCAR Connect Tablet offers instant access to driver-friendly tools for everything from parking, digital CMR documents and 'sign-on-glass' to live vehicle data integration or compatibility with third-party black boxes. Favourite app missing? Fleet managers can contact DAF to have them onboarded.

And that's not all. The tablet links to the PACCAR Connect portal, offering many options. Drivers can select addresses in third-party apps, open them in the DAF Truck Navigation app and start navigating with ease. They can also take the unit out of the cab and use it to carry out external vehicle checks. Robust and handy, the tablet is easy to detach and clicks just as easily back into its mounting cradle on the dashboard.

Ex-factory or retrofit

Supplied ex-factory on the latest DAF trucks, the PACCAR Connect Tablet is also available for retrofit on all earlier DAF models.

**Upgrade now your current vehicle parc with this PACCAR Connect Tablet.
Contact us today!**

Easy reach

"I'm very happy with the tablet. It's in a good place on the dashboard, easy to operate without distraction. It makes my daily business more efficient."

Pedro Antonio Diaz,
Driver at Grupo Tractole
Ciudad Real, Spain

Try the new, mobile-friendly Vehicle Search

Looking for replacement parts for your truck or fleet? Use the new Vehicle Search on the updated DAF Webshop. Whether you're behind a computer or in the workshop on a mobile, it's faster and easier than ever to find the exact parts, prices and service kits you need. And this is just the start – there are more exciting functionalities on the way.

Just type in your vehicle or chassis number and find the parts you want with accurate prices and the latest promotions. Order with confidence, without extra phone calls to our dealership, knowing that you're seeing up-to-date stock availability. The DAF Webshop Vehicle Search has been fully redesigned to be more user-friendly, especially from mobile devices.

Large, searchable diagrams make it even easier to find the exact parts you want, directly from your mobile. If needed, warehouse managers can print out the diagrams first, to check if they're ordering the right parts.

Easy access to service kits

Once difficult to find, complete service kits for your specific vehicle are now just a click away, right on the first page of Vehicle Search. Think of filter kits, tensioner gear sets, clutch kits, NOx sensor kits and more. You can even check which parts are in the kit and choose to order the individual parts or their alternatives if you prefer. And increasingly, you'll be able to browse for electric truck items too. DAF is committed to continuously improve your online experience.

DAF Genuine Clutch Kits – the best for your truck

A good clutch is essential for smooth acceleration, truck control and driver comfort. Choose DAF Genuine parts and you can be sure of the right fit and excellent reliability.

By offering clutch kits for DAF vehicles, we're committing to keeping your DAF truck in good condition, regardless the model and age. These complete clutch-replacement solutions are of the highest quality, ensuring durability and maximum uptime for your fleet.

Nothing Beats Original: DAF Genuine Clutch Kits

Like all DAF Genuine Parts, the Clutch Kits are produced only by selected partners and are rigorously tested by DAF engineers. Each kit contains the clutch plate, cover and an actuator that offers superior performance.

*“Don’t opt for alternatives.
Choose approved, quality products
for peace of mind.”*

Koen van den Schoor
Product Manager
PACCAR Parts Europe

A DAF Genuine Clutch Kit is the right choice, particularly for your newer trucks. The kit is:

- Specifically made for even the most modern DAF trucks
- Made to the highest DAF technical and quality specifications
- Designed for maximum uptime and lowest cost per kilometre.

Nothing Beats Original!

Reliability

“We avoid downtime by having a local DAF workshop perform regular maintenance that keeps our fleet in top condition. I trust them to use the right part if a clutch needs replacing.”

Gerardo Calvo Moreno,
Manager at Grupo Tractole,
Ciudad Real, Spain

Why choose DAF
Genuine Clutch Kit?

XD XF
ELECTRIC

DAF continues its winning streak

The New Generation DAF XD Electric and XF Electric put DAF back on top of the podium, earning the prestigious International Truck of the Year award 2026.

It's no surprise. These 'zero emission' distribution champions feature a high efficient, supersmooth driveline with imperceptible gear changes. Plus, their modular design offers enormous flexibility in battery and axle configurations, which is great for owners and body builders and saves costs too. And, as with all the New Generation DAF trucks, these electric models continue to set unbeatable standards in efficiency, safety and driver comfort.

Zero emissions

The XD Electric and XF Electric are part of a complete range of DAF Electric trucks designed to address the growing number of Zero Emission Zones across the EU (and the UK).

Looking towards the future

"At the moment, we still drive diesel trucks since the charging infrastructure in Spain is in development. When that changes, we'll obviously look at DAF's electric models since electricity is cheaper than diesel and that would reduce our operating costs."

Pedro Antonio Diaz,
Driver at Grupo Tractole,
Ciudad Real, Spain

Find out more about
these DAF winners

Superb driver comfort

The DAF XD Electric is seen as the best distribution truck for urban and regional transport where Ultra Low or Zero Emission Zones are in place. With its advanced safety features, a state-of-the-art powertrain and a low positioned cab, the XD Electric offers superb driver comfort and ultimate direct view. It's considered the all-round transport solution for almost all 'zero emission' applications.

Outstanding performance

When a sustainable transport solution is needed for both regional and national distribution, the DAF XF Electric is the answer. The XF Electric has a range of over 500 km, just like the XD Electric. Equipped with advanced safety features and smooth driveline, it also has a bigger cab, boosting driver comfort on those longer trips.

The power behind the winners

Behind every great electric truck, there's a great charger! PACCAR Power Solutions is proud to provide the charging solutions that keep these award-winning trucks moving and help drive the future of zero-emission transport. See PACCAR Power Solutions as your one-stop shop for a smooth transition to electric transport. Find the charging solution for your business needs, selecting from our total package of energy storage and management systems.

PACCAR POWER SOLUTIONS

Find out more about
the new TRP Brake Disc

New TRP parts for older trucks

We're excited to introduce three new TRP products designed to keep older DAF trucks running reliably — and to make life easier for mechanics.

TRP Brake Disc – safety first

Brake discs are all about stopping power. Because safety is essential! So when it's time to replace the discs on your older DAF models, choose aftermarket parts that deliver consistent performance and greater confidence out on the road.

Featuring a new design, this TRP Brake Disc is the only type that's tested by DAF for older trucks. It has passed the rigorous Pavé test that simulates harsh, real-life road conditions.

Competitively priced, the TRP Brake Disc features excellent heat dissipation and bolt pretension security, giving it high resistance to surface cracks. For easy fitting, a complete installation kit comes together with the brake disc.

Find out more about the new TRP Tensioner Pulley kit

TRP Tensioner Pulley Kit – a smart choice

Is your truck's Poly-V belt due for replacement soon? Fitting new, individual belts on older DAF models may seem cost effective short term, but it doesn't guarantee long-term performance.

A complete tensioner kit is the smart choice – faster installation, longer uptime and lower costs over time.

The new, all-in-one TRP Tensioner Pulley Kit includes everything you need for a complete repair: a TRP Poly-V belt, a tensioner, and an idler. Tested by DAF, this kit offers dependable performance and durability, backed by a two-year warranty – all at a competitive price.

Find out more about the new TRP Air Bellows

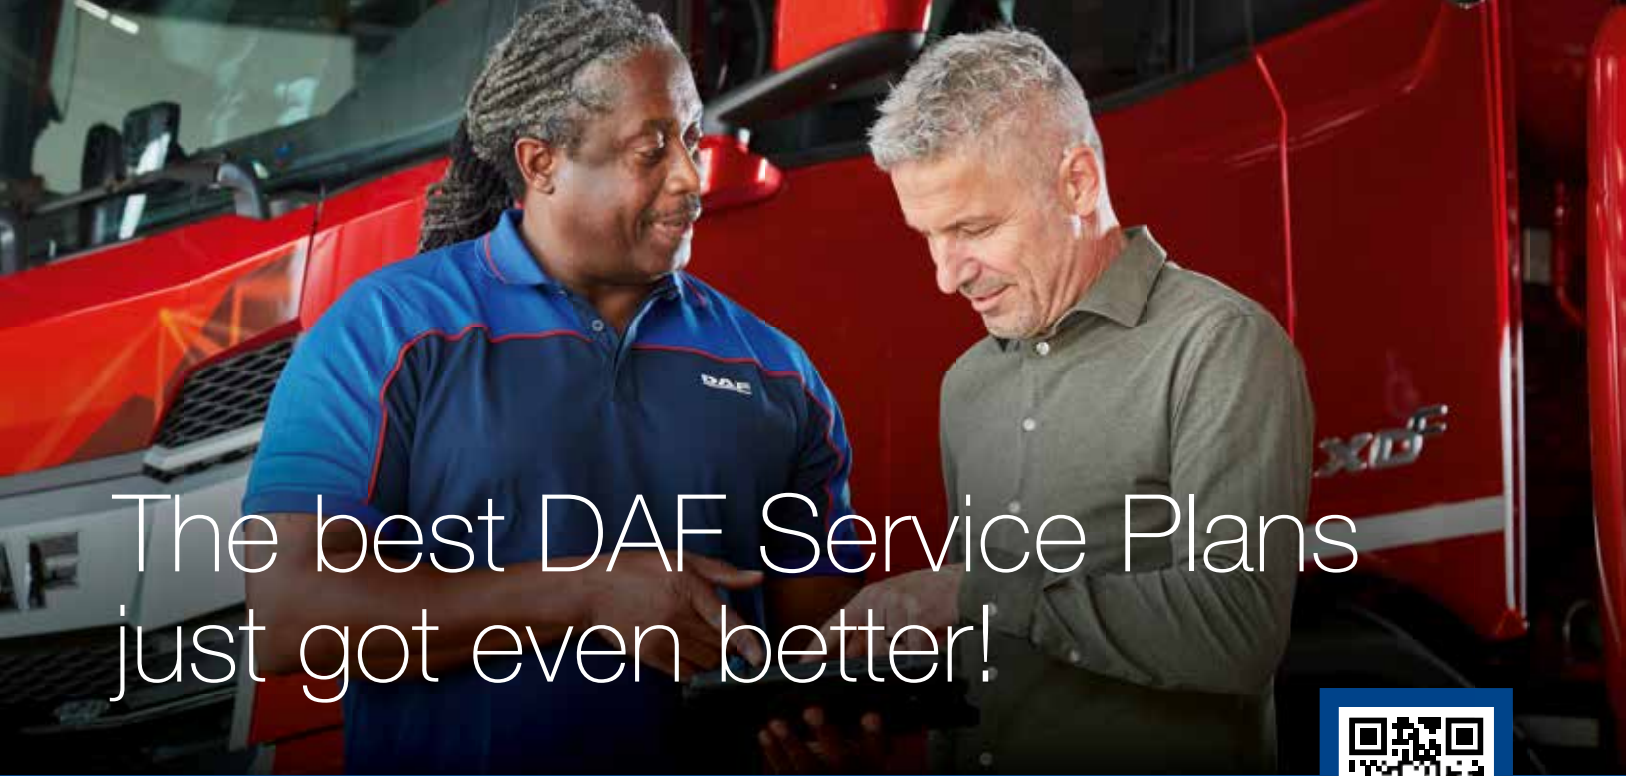

TRP Air Bellows – OE quality, aftermarket price

Carrying valuable equipment or delicate loads? Looking for a safer and more comfortable ride? Fit the new TRP Air Bellows, the cost-effective alternative for older DAF trucks.

Tested by DAF, these bellows are designed to closely match OE specifications, ensuring a perfect fit and reliable performance. And they're manufactured with durable materials, to help maintain comfort and maximize uptime.

If you're starting to see air leaks, surface cracks or experience sagging suspension it is time to fit your older DAF truck with these high-quality bellows.

The best DAF Service Plans just got even better!

For more flexibility, choose DAF Dynamic Service Plan

Cut costs, boost efficiency, improve reliability and gain peace of mind. Sounds like a good deal for you and your customers. Take a closer look at the new DAF Dynamic Service Plan and DAF Uptime Plus, both available with DAF's most comprehensive MultiSupport Service Plans.

DAF Dynamic Service Plan

The DAF Dynamic Service Plan is your pay-as-you-drive option. Instead of a fixed monthly payment, your fee is calculated based on the actual kilometres driven per vehicle. This flexibility is ideal if your business experiences peak and quiet periods.

The dynamic service plan is available if you're using PACCAR Connect. It comes with full coverage, similar to the most comprehensive MultiSupport Service Plans.

Back on the road faster with DAF Uptime Plus

DAF Uptime Plus is an extra safety net that complements DAF's most comprehensive and dynamic MultiSupport Service Plans. If your truck breaks down, this option helps minimise disruption and maximise uptime.

DAF commits to getting your vehicle back on the road within eight hours from the time you get in touch. If the deadline passes and no loan vehicle is available, DAF compensates you financially for each day of downtime! Reimbursement is applied automatically as an offset to your MultiSupport invoice.

Choose peace of mind with DAF Uptime Plus. Contact us today.

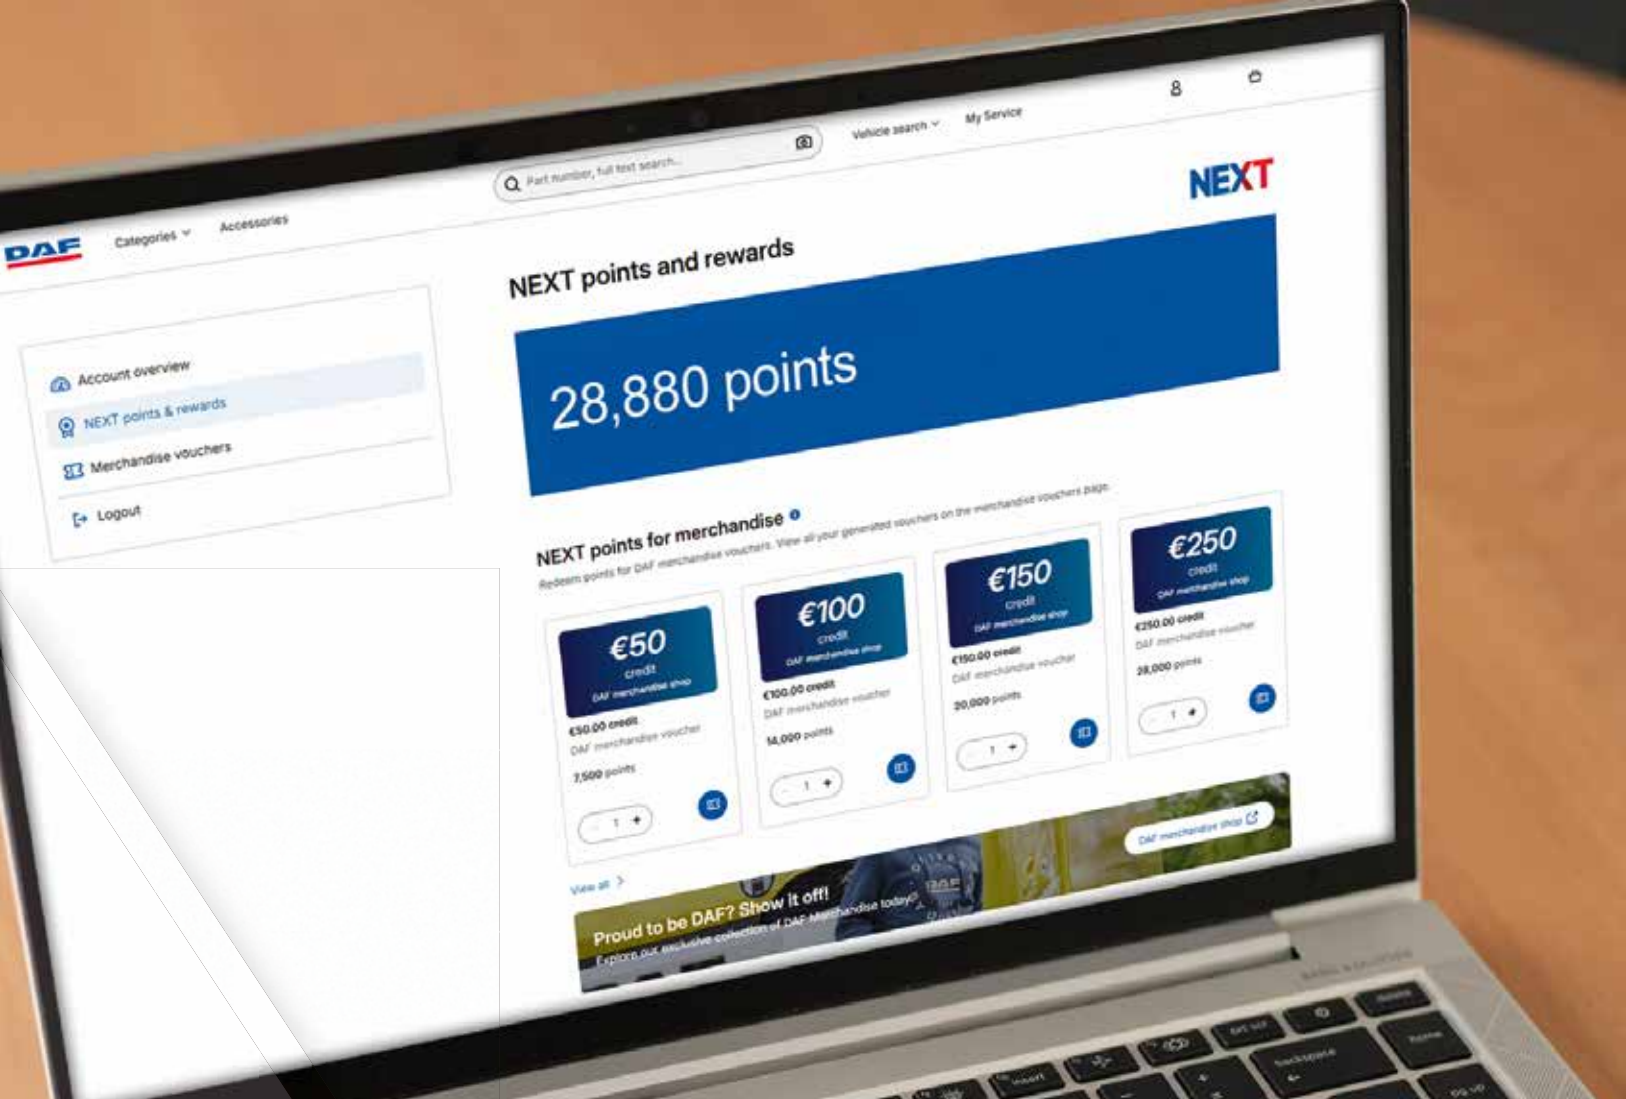

All DAF MultiSupport Service Plans and optional products are subject to its terms and conditions. Please contact us for more information.

Satisfaction

"These sound like interesting developments! Obviously, the faster our drivers are back at the wheel, the better it is for our business and our customers."

Gerardo Calvo Moreno,
Manager at Grupo Tractole,
Ciudad Real, Spain

The best DAF Service Plans just got even better!

Cut costs, boost efficiency, improve reliability and gain peace of mind. Sounds like a good deal for you and your customers. Take a closer look at the new DAF Dynamic Service Plan and DAF Uptime Plus, both now available with DAF's most comprehensive MultiSupport Service Plans.

DAF Dynamic Service Plan

Created in response to customer demand, the DAF Dynamic Service Plan is your pay-as-you-drive option. Instead of a fixed monthly payment as with our traditional plans, your fee is calculated based on the actual kilometres driven per vehicle.

This more flexible approach is ideal if your business is cyclic and experiences peak and quiet periods. It simplifies your payment management and aligns costs more closely with operational realities, leading to better budgeting and cash flow.

The dynamic service plan is available if you're using PACCAR Connect and comes with full coverage, similar to the most comprehensive MultiSupport Service Plans. You can expect:

- Variable monthly payments based on actual kilometres driven
- A full service plan with no compromises.

For more flexibility, choose
DAF Dynamic Service Plan

Back on the road faster with DAF Uptime Plus

DAF Uptime Plus is an extra safety net that complements DAF's most comprehensive and dynamic MultiSupport Service Plans. If your truck breaks down, this option helps minimise disruption and maximise uptime.

DAF commits to getting your vehicle back on the road within eight hours from the time you get in touch. If the deadline passes, and no loan vehicle is available, DAF compensates you financially for each day of downtime!

Hassle-free process

Compensation happens seamlessly without paperwork or phone calls. DAF tracks your vehicle status with DAF International Truck Service and applies reimbursement as an offset to your MultiSupport invoice. The compensation guarantee applies across all authorised DAF Partners throughout Europe.

Choose peace of mind with DAF Uptime Plus. Contact us today.

All DAF MultiSupport Service Plans and optional products are subject to its terms and conditions. Please contact us for more information.
